Summary

Program Management Leader with **11+ years** delivering large-scale loyalty, rewards, and BFSI platforms for major banking clients — spanning end-to-end program delivery, Agile/SAFe execution, cross-functional team leadership, and enterprise release governance. Reduced post-production defects by 30%, improved on-time delivery from 75% to 92%, and accelerated feature rollout by 50% across multi-module ecosystems serving ICICI Bank, Kotak Mahindra, and other enterprise clients.

Technical Skills

Program Management: Agile, SAFe, Waterfall, PI Planning, Sprint Planning, Release Management, Backlog Grooming
Domains: BFSI, Loyalty & Rewards, Benefits Administration, Redemption Workflows, Travel Booking
Quality & Automation: Selenium, TestNG, CI/CD Integration, Regression Automation, Root Cause Analysis
Tooling & Reporting: JIRA, Governance Dashboards, Defect Density Tracking, Velocity & Throughput Metrics
Stakeholder Mgmt: Cross-functional Leadership (Engineering, QA, DevOps, UI/UX, Analytics), C-level Alignment

Experience

Reward360 Global Services | *Lead Program Manager* Bangalore, India | Mar 2022 – Present

Enterprise loyalty, rewards, and BFSI delivery platform — clients include ICICI Bank and Kotak Mahindra

- Directed end-to-end delivery of a **multi-module loyalty platform** (rewards, benefits, redemptions, travel booking, customer engagement) for 30+ cross-functional team members; executed **12+ major releases with zero schedule delays**.
- Improved on-time delivery from **75% to 92%** by optimizing sprint cadence, prioritizing backlog, and eliminating cross-team dependency bottlenecks.
- Reduced post-production defects by **30%** by introducing quality gates, structured root-cause analysis discipline, and deployment readiness frameworks across all release cycles.
- Accelerated feature rollout by **50%** by streamlining requirement approvals, unblocking dependency chains, and standardizing change request workflows.
- Established **governance dashboards** tracking throughput, defect density, velocity, and release stability — providing executive visibility across all active programs.
- Partnered with Product Heads and Technology Leads at senior banking clients to align roadmaps, manage expectations, and translate complex business requirements into actionable delivery plans.
- Facilitated PI planning, sprint ceremonies, stakeholder showcases, and signoff cycles; enhanced team productivity by **25%** through structured Agile cadences.

Reward360 Global Services | *QA Lead* Bangalore, India | Feb 2019 – Mar 2022

- Led QA strategy for enterprise loyalty modules — functional, regression, and automation — reducing regression execution time by **40%** through Selenium/TestNG frameworks integrated into CI/CD pipelines.
- Managed cross-functional defect triage, release quality gates, and root-cause analysis; mentored QA team on automation best practices.

Hyva IT Solutions | *Test Automation Engineer → Software Test Engineer* Bangalore, India | Mar 2014 – Feb 2019

- Designed and implemented automation frameworks for web applications; reduced manual testing effort significantly and improved release stability across enterprise client portfolios.
- Executed end-to-end test cycles (functional, integration, regression, UAT) and tracked defect resolution through JIRA across multiple client engagements.

Key Deliverables

Enterprise Loyalty Management System (BFSI) | *Agile, SAFe, JIRA, Governance Dashboards*

- Delivered multi-module loyalty platform across rewards, benefits, redemptions, and customer engagement for major banking clients; managed 30+ team members with zero major release delays.

Rewards Management & Travel Booking Platform | *Real-time Rewards Engine, Payment Gateway Integrations*

- Managed real-time reward calculation engine integrated with multiple partners and payment gateways; oversaw flights and hotels booking portal with loyalty points and mobile-responsive checkout.
